

# ÁLVARO BALLARINI

FULL STACK ENGINEER | NODE.JS, TYPESCRIPT, REACT/NEXT.JS | B2B PRODUCTS & PERFORMANCE

Rosario, Argentina | [linkedin.com/in/alvaro-ballarini](https://www.linkedin.com/in/alvaro-ballarini) | +54 341 640 2550 | [alvaroballarini03@gmail.com](mailto:alvaroballarini03@gmail.com)

## PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years of experience building and evolving high-performance B2B products end-to-end with Node.js, TypeScript, React, and Next.js. Strong background in translating requirements into technical solutions, designing robust REST APIs and relational data models, and optimizing SQL performance. Delivered ~50% faster processing and ~70% fewer production errors through database optimization and integration testing. Experienced in stakeholder collaboration, estimation, code reviews, and integrating modern services with legacy .NET systems.

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                          |

| <ul style="list-style-type: none"><li>Led the end-to-end design and evolution of B2B products using Node.js, TypeScript, React, and Next.js, from technical requirements analysis through continuous production delivery.</li><li>Designed relational schemas, indexes, and SQL query optimizations, reducing processing times by ~50% and materially improving application responsiveness.</li><li>Introduced integration testing with Jest/Vitest for critical endpoints and services, contributing to ~70% fewer production errors and stronger operational stability.</li><li>Coordinated integrations between modern Node.js/React services and legacy .NET systems while promoting refactoring, code reviews, and clean-code standards.</li><li>Worked directly with stakeholders to clarify requirements, estimate development effort, and deliver in short, value-focused iterations.</li></ul> |                                          |

## TECHNICAL SKILLS

**Backend:** Node.js, TypeScript, JavaScript (ES6+), REST APIs, Express, Fastify, NestJS, .NET (legacy)  
**Frontend:** React, Next.js, HTML5/CSS3, component architecture, UX optimization  
**Data & Performance:** PostgreSQL, SQLite, SQL, Prisma ORM, indexing, query optimization  
**Testing & DevOps:** Jest, Vitest, Docker, CI/CD (GitHub Actions), Git, Vercel  
**Engineering Practices:** Technical analysis, estimation, code reviews, mentoring, Agile methodologies

## EDUCATION & LANGUAGES

**Technical Diploma in Information Technology** - Casa Salesiana San José, Rosario, Argentina | 2017 - 2022  
Languages: Spanish (Native) | English (B1-B2, intermediate technical proficiency)
